All in one deactivator

A plug and play RF deactivator with the pad and electronics integrated into one product. Its slim design makes it suitable for various ways of implementations. RF labels will be deactivated when they are moved over the deactivator. In case of hard tags the deactivator will work as a double checker and give a sound, indicating there is still a tag on the merchandise which needs to be removed.

Specifications

Frequency	8.2 MHz
PSU Voltage	110-220V / 500mA
Dimensions	243 * 232 * 20 mm
Sounds adjustment	Yes
Sensitivity adjustement	Yes
Gross weight	1 kg
Detection height	Up to 25 cm
Deactivation height	Up to 25 cm
Material	ABS
