RF Deactivator

A plug and play RF deactivator with the pad and electronics integrated into one product. Its slim design makes it suitable for various ways of implementations. RF labels will be deactivated when they are moved over the deactivator. In case of hard tags the deactivator will work as a double checker and give a sound, indicating there is still a tag on the merchandise which needs to be removed.

Specifications

Description	RF Deactivator
Article number	XD-DEACTRFPBD
Frequency	8.2 MHz
