More products on shelf, better protection, and reduced handling time!
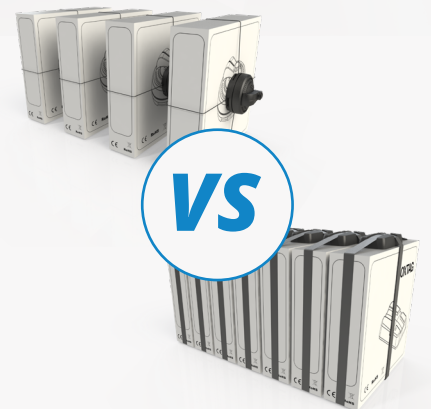

Those are the features of the BOXTAG, designed to secure boxed products. Traditionally, spider wraps have been used for this purpose for decades.

However, the space occupied by spiders is substantial, which limits the number of packaged products on the shop floor. The BOXTAG, with a height of only 15 mm, is up to 80% lower compared to spiders.

Additionally, it can be easily applied to the side of a box in many cases, allowing for easy stacking of boxes.

Specifications

Description	Boxtag
Article code	300 200 002
Base length	75 mm
Base width	38 mm
Base heigh	19 mm
Alarm	Optical and Audio Alarm when removed from a box and triggering an EAS system when passing a 58 kHz (AM) or 8.2 MHz (RF) system
Volume	85 db
(De)activating	SRF Key
