

Europe's most popular EAS accessories at the best possible price.

Bottle Guard

The Bottle Guard practically works on every bottle, large or small, to prevent it from theft. The tag is specially designed to fully cover the top part of the bottle neck, preventing it from being opened in store. It comes in RF + AM frequency integrated. The Bottle Guard is delivered in a full black with a transparent part so no part of the bottle is fully covered. The tag comes with a Super Lock structure which firmly holds the tag in place.
