

Europe's most popular EAS accessories at the best possible price.

Premium Cosmetic Labels

The Premium cosmetic label secures very small items with limited space for protection. Often those products are quickly hidden or taken without attracting attention. The AM cosmetic label provides consistent deactivation at the point-of-sale and reliable detection performance. EAS Europe offers these labels in **plain** and **black**. All our AM labels have triple resonators ensuring superior detection and deactivation.

Our AM security labels are compatible with all AM detection systems and AM security label deactivators.
